Invitation Letter

Dear Dr. **Xianfeng Chen**,

You are cordially invited, on behalf of the organizing commission, to give a presentation at **Session 3-2: Bioinformatics Research for System Biology** of BIT Life Sciences' 4th Annual World Congress of BioSoft (BioSoft 2012). The theme of this upcoming conference is "From e-Cells and e-Molecules to m-Health". The conference will be held at China National Convention Center, Beijing, China from March 23-25, 2012.

The conference is the 4th Annual Conference organized by BIT Life Sciences. BioSoft 2012 is a parallel forum of BIT Life Science & 4th Annual and Peptide Conference. The ultimate goal of the conference is to open a new world for IT industry. Hundreds of scientific presentations will attract 800 local and international professionals to involve into the event.

Recently, BioSoft has shown significant growth in both IT and Life sciences Sectors, Bio-Soft has been widely used in programs for data analysis, graph plotting, statistics, densitometry, dose-effect analysis, assays, curve-fitting, enzyme kinetics, teaching and more. With the fast development of life sciences, Bio-Soft will definitely be the most promising industry. The symposium will be designed to offer a unique opportunity not only to take a critical examination of the milestone achievements in Bio-Soft but more significantly, to discuss how Bio-Soft can contribute more to the fight against financial crisis and explore possibilities for traditional IT companies to enter into a new area. The program will feature contributions from both academic and industrial sides, and will provide a platform for representatives to predict the future trend of Bio-Soft from all over the world.

BioSoft 2012 consists of 10 main symposiums, panel discussions, free communications, poster presentations, and Exhibition booths. The program will be released at the conference website in a few weeks so that you can know what specific subjects will be covered by the other speakers. You may log on: <http://www.bitlifesciences.com/biosoft2012/> or contact with me directly to get more details.

We would be honored if you could attend the BioSoft 2012 Conference.

Look forward to your reply.

Sincerely yours,

Xiaodan Mei, Ph.D.

Executive Chair of Biosoft 2012

The Organizing Committee of Biosoft-2012
